PROFESSIONAL SUMMARY

Software Developer specializing in Python (Flask), PHP, MySQL, and web-based information systems. Experienced in developing real-world management systems, interactive dashboards, GIS-based mapping applications, mobile-friendly web applications, and database-driven solutions. Skilled in building outage monitoring systems with data visualization, map-based feeder tracing, record management, file upload processing, reporting/export features, user authentication, and LAN/mobile accessibility. Passionate about creating practical, scalable software solutions and continuously improving technical skills.

TECHNICAL SKILLS

Programming Languages:	PHP, Python (Flask), JavaScript, HTML, CSS
Frameworks & Libraries:	Flask, Bootstrap 5, Leaflet.js
Databases:	MySQL, SQLite, phpMyAdmin
Tools & Technologies:	Visual Studio Code, XAMPP, Git, GitHub
GIS & Data:	KML, GPX, Excel, Google Sheets
Mobile & Deployment:	Mobile Web App, Android WebView / Capacitor, LAN Deployment, Waitress Server

PROJECTS

Nueva Ecija II Electric Cooperative Area 1 Outage Management System + Mobile App

- Developed a GIS-powered outage management system that visualizes power interruptions, estimates affected consumers and power loss, validates uploaded KML/GPX/Excel files, and generates analytical reports for field operations.
- Built a mobile field-reporting interface where utility teams can add and update interruption records from a phone.
- Implemented feeder-based search, Pole ID lookup, interruption editing, and synchronization between mobile records, dashboard analytics, and GIS mapping.
- Data upload & validation using KML, GPX, and Excel.
- Technologies: Python Flask, JavaScript, SQLite, Leaflet.js, Bootstrap, KML, GPX, Excel, Android WebView/Capacitor.

Nueva Ecija II Electric Cooperative Area 1 Engineering Document Management System

- Built a centralized document management platform featuring document uploads, workflow tracking, search and filtering, analytics dashboards, and complete audit trails.
- Features: document uploads & user management, status tracking with history logs, search & filter documents, analytics dashboard for workflow overview.
- Technologies: PHP, MySQL, JavaScript, Bootstrap.

Apartment Management System

- Developed a full-stack apartment management system for managing tenants, payments, maintenance requests, occupancy tracking, and role-based administration with automated reporting features.
- Features: tenant & unit management, payment monitoring, maintenance request tracking, occupancy dashboards, and admin/staff role-based access.
- Technologies: PHP, MySQL, JavaScript, Bootstrap, XAMPP, Git.

EXPERIENCE

PROGRAMMER – ENGINEERING DEPARTMENT (NEECO) <i>Nueva Ecija Electric Cooperative, Inc. (NEECO)</i> <i>Project Based</i> - Developed and maintained web applications and tools for the Engineering Department. - Built and enhanced outage monitoring systems with GIS mapping, data processing, and automated reporting features. - Implemented map-based feeder tracing, KML/GPX data processing, and file upload validation for field operations. - Developed a mobile-accessible interruption reporting workflow for field personnel connected to the main dashboard and GIS map. - Generated analytical reports and dashboards to support decision-making and operations. - Collaborated with engineers and field personnel to translate requirements into efficient software solutions. - Ensured system reliability, security, and LAN/mobile accessibility of applications.	Jan 3, 2024 – Jun 5, 2024
--	---------------------------

VIRTUAL ASSISTANT (CRYPTO) - Managed digital asset records and portfolio tracking. - Maintained organized transaction logs using Excel and Google Sheets. - Monitored NFT marketplace activity and generated performance reports. - Improved data organization and reporting accuracy.	2019 – 2021
---	-------------

WORK IMMERSION – MULTIMEDIA PRODUCTION <i>Central Luzon School of Media Arts</i> - Assisted in the animation and video editing process. - Learned and applied basic multimedia production techniques.	Dec 2018 – Apr 2019
---	---------------------

EDUCATION

Nueva Ecija University of Science and Technology <i>Bachelor of Science in Information Technology</i>	Graduated: June 10, 2026 Talavera, Nueva Ecija, Philippines
