

ARNAUT EZEKIEL ALFONSO

WEB DEVELOPER | PUBLIC-SECTOR SYSTEMS & APPLICATION SUPPORT

Nueva Ecija, Philippines | +63 905 832 7342 | arnautalfonso88@gmail.com
arnaut.vercel.app | github.com/arnaut560000 | linkedin.com/in/arnaut-alfonso

PROFESSIONAL SUMMARY

Web developer with experience delivering and maintaining systems for local government and engineering operations. Developed a free dental scheduling web application and a locally hosted information system using Supabase, Render, Python, and Flask. Combines application development with technical support for government staff.

TECHNICAL SKILLS

Languages: PHP, Python, JavaScript, SQL, HTML, CSS

Frameworks & UI: Laravel, Flask, React, Next.js, Bootstrap, Tailwind CSS, Leaflet.js

Databases & deployment: MySQL, SQLite, Supabase, Render, Vercel, LAN deployment

Tools & data: Git, GitHub, Excel, Google Sheets, KML/GPX, Android WebView/Capacitor

RELEVANT EXPERIENCE

Web Developer - Mayor's Office

Local Government Unit (LGU) | Jul 1, 2025 - Aug 11, 2026

- Developed and maintained a web-based scheduling system for free dental services using Supabase and Render.
- Built and maintained a locally hosted information system for the Sanitation Office using Python and Flask.
- Provided technical support to staff across the local government while maintaining both applications.

Programmer - Engineering Department (Project-based)

Nueva Ecija Electric Cooperative, Inc. (NEECO) | Mar 2025 - Jun 2025

- Developed web applications for engineering operations, including GIS outage monitoring, dashboards, and reports.
- Implemented feeder tracing, KML/GPX/Excel upload validation, and mobile interruption reporting connected to the main GIS dashboard.
- Collaborated with engineers and field personnel to translate operational requirements into application features.

SELECTED PROJECTS

Outage Management System & Mobile App | Python/Flask, SQLite, Leaflet.js

- Built GIS views with affected-consumer and energy-loss estimates, feeder search, Pole ID lookup, and mobile reporting linked to dashboard analytics.

Engineering Document Management System | PHP, MySQL, JavaScript

- Built document uploads, search and filtering, user management, and status tracking with history logs to give engineering staff visibility into document workflows.

Apartment Management System | PHP, MySQL, Bootstrap

- Developed tenant and unit management, payment monitoring, maintenance requests, occupancy dashboards, and admin/staff access with role-based permissions.

EDUCATION

Bachelor of Science in Information Technology | Graduated June 2025

Nueva Ecija University of Science and Technology | Talavera, Nueva Ecija
